

Process View - Hayam

Discussion:

Our Sports Event Ticketing App's Process View uses diagrams to show the steps for buying tickets and checking if they're available. These diagrams make it easy to see how everything works from start to finish.

Motivation:

We created this view to make sure that anyone using our app can easily understand how to do things like buy a ticket or see if seats are open for an event. It's designed to be clear and simple, which makes for a better experience. Plus, we can add new features later on without any trouble.
